### MyBus Product Background

Since the first Thomas Built bus rolled off the assembly line in 1936, the company has focused on delivering the smartest and most innovative buses in North America. Today, that same dedication to building the most reliable, safest vehicles possible has made Thomas Built a leader in the industry.

Through our experience and commitment to our customers, we created a new Type A product, MyBus™, for childcare and activity centers, churches, service organizations, small businesses and other clubs and groups. MyBus was designed to be one of the toughest Multi-Function School Activity Buses (MFSAB) on the road, yet one of the easiest to drive and own. An MFSAB meets the same Federal Motor Vehicle Safety Standards (FMVSS) as school buses, but is not required to have stop arms or traffic control lights and, in most states, is not required to be yellow.

Understanding that transportation is not the primary business of the typical MyBus owner, the vehicle was designed to be safe, easy to maintain and durable enough to withstand the daily rigors of transporting children and adults. Its full-height (73" interior headroom), outward opening entrance door and wide aisle allow for easy access to passengers. The all-steel safety cage body construction and two roof crash rails offer added passenger and rollover protection, and the interior features automotive style gauges and driver controls. MyBus is available in three models: the SRW, DRW 041 and DRW 051.

- o The MyBus DRW 051 offers dual rear wheels and optional coach seating for up to 30 passengers.
- o The MyBus DRW 041 offers dual rear wheels and optional coach seating for up to 20 passengers.
- o The compact MyBus SRW, offers single rear wheels and is the same width as a passenger van for easy around-town trips. Seating up to 14 passengers, the SRW model does not require a commercial driver's license in many states.

Thomas Built Buses, Inc. is a subsidiary of Daimler Trucks North America LLC, the largest heavy-duty truck manufacturer on the continent and a leading manufacturer of class 4-8 vehicles. Daimler Trucks North America produces and markets commercial vehicles under the Freightliner, Western Star and Thomas Built Buses nameplates. Daimler Trucks North America is a Daimler company.
